# SalesAnalysis™

## Consolidate and analyze sales information in one powerful system.

SalesAnalysis™ from Empowering Systems provides salespeople with a wealth of sales information at their fingertips, eliminating the need for paper based reports or complicated spreadsheets which are time consuming and quickly out of date. SalesAnalysis empowers salespeople with software tools to consolidate and analyze sales information in one integrated system. The powerful technology of replication synchronizes information out to salespeople.

An easy to use data import wizard allows for rapid imports of bookings, billings and commissions. Imports in almost any format reduce the time and effort required for entering data. Manufacturers can even integrate it directly with their ERP software to automate information flow. Because SalesAnalysis is fully integrated with AccountManager account responsibility is easily managed and maintained, duplicate data entry is eliminated and sales people can see account level sales from right on their dashboard.

- Customer and distributor bookings, billings and commissions
- Manage Design Win commissions
